- ✗ antistatic plate and microstructured vacuum foil
- ✗ vacuum for perfect contact
- ✗ short exposure time
- ✗ high precision production of cliché
- ✗ easy to operate

Exposure Unit MSG 24 x 58

These vacuum exposure units of Tampomark are capable of exposing water or alcohol washable clichés.

The short exposure time and the highly precise detail reproduction are ensured by super actinic 40 W UV lights, highly durable vacuum pump and microstructured vacuum foil. The antistatic vacuum foil prevents the occurrence of dust errors and guarantees a vacuum that is free from blow holes. Special reflectors assure consistent illumination of the exposure area.

Technical data	MSG 24 x 58
clichee size	240 x 580 mm
feature	4 UV light bulbs (40 W)
power supply	230 V
weight	27 kg
width	700 mm
