- ✘ no need to decant the washout solution
- ✘ easy cleaning by removable plush
- ✘ optional pneumatic drive

Clichee washer

KW 25 x 35

KW 25 x 35 P

Figure shows pneumatic drive

With our clichee washer KW 25 x 35 and KW 25 x 35 P of Tampomark you can wash out alcohol or water based clichees evenly, comfortably and tidy.

By constantly washing your clichee you will receive a constant clichee depth, which is essential for an evenly print image.

The effective area of 250 x 350 mm allows you to work efficient and flexible.

This unit is equipped with a hand crank. While tuning the magnet plate you are washing out the fixed clichee on the plush.

No annoying decanting of washout solution. In closed unit remaining medium will not evaporate (even not if volatile liquid). It is instantly at your disposal for the next cleaning procedure. The filling amounts to 8 liter.

If it is needed to exchange the wash-out solution you can easily empty the washer with the bleeder on the back side. To clean the plush panel you can remove it out of the washer.

For optimal results, we recommend that you acquire the below presented set of equipment (Please ask about the data sheets):

Exposure unit

Clichee cleaner

Clichee dryer
