## Pad printing cliches

- ✕ Extremely easy handling
- ✕ Suitable for open and closed ink cup systems
- ✕ Suitable for all pad printing machines
- ✕ Small to very high quantities
- ✕ Very good print quality

# Pad printing cliches

Tampomark GmbH manufactures and supplies you with tampon printing cliches for all pad printing machines on the market. We deliver both blanks and ready-to-print cliches in all formats.

Together with the pad, the cliché plays a significant role for the printing quality. We offer five types of clichés, which differ in terms of service life and application.

## Alcohol washable cliches

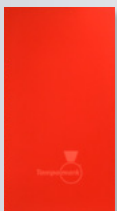

*The clichés are characterized by the best print quality. Ideal for closed ink cup systems.*

### **Cliche AK1 red**

Suitable for open and closed ink cup system, high volume, best print quality

### **Cliche AK7 red brown**

Suitable for open and closed ink cup system, medium quantities, very good print quality

## Water washable cliches

*Environmentally friendly alternative to alcohol washable cliches.*

### **Cliche WK2 orange**

Suitable for open and closed ink cup system, small and medium quantities, reasonable price.

---

### **Cliche WK7 red**

Suitable for open and closed ink cup system, high volume, very good print quality.

---

### **Cliche WK8 orange**

Suitable for open and closed ink cup system, small and medium quantities, very good print quality.

## Laser cliches (layer removal by laser)

*Cliches are produced with a laser without film creation.*

### **Cliche LK1 black**

Anodic coating on both sides, small and medium quantities, very good print quality, without steel backing.

---

### **Cliche LK2 blue**

Single-sided anodic coating, medium and high quantities, very good print quality, magnetic with steel backing.

---

### **Cliche LK3 black**

Anodic coating on one side, medium and high quantities, suitable for drum laser, magnetic with steel backing.

---

### **Cliche LK4 black**

Single-sided anodic coating, small and medium quantities, very good print quality, magnetic with steel backing.

## Steel cliches (print-ready etched/unetched)

*Ideal for high volumes, for open and closed ink cup systems in pad printing.*

### **Steel cliché 0,5mm**

Suitable for open and closed ink cup system, high volume, very good print quality.

---

### **Steel cliché 10mm**

Suitable for open and closed ink cup system, very high quantities, very good print quality.

## Ceramic cliché

*No corrosion with aggressive inks. Ideal for high volume and fast running machines.*

### **Ceramic cliché 10mm**

Suitable for closed ink cup system, very high quantities.
